MEMORANDUM

TO: All wvOASIS Users
FROM: State Auditor John B. McCuskey 
DATE: May 1, 2019
RE: Advantage Software Upgrade

Today, the Enterprise Resource Planning Board (ERP) announces an upcoming major technical upgrade to wvOASIS. This upgrade to CGI Advantage 3.11, from our current version of 3.9, is the final phase of the ERP implementation plan initiated in 2011.

This upgrade is defined as a technical upgrade because there will be little to no impact on users' daily activities. Advantage 3.11 offers enhanced functionality for P-Card and Grants Management, as well as adding standardized code for some customizations. Once the ERP Board becomes proficient with the upgraded system, any new functionality will be evaluated for implementation.

To accomplish this upgrade, the ERP Board will focus on implementation and testing over the next several months in order to ensure a smooth and successful transition. The current State code base will be frozen with the only changes (application, interfaces, reports) being requirements to comply with any changes in State law.

The ERP Board and certain agencies will be working with CGI to test and implement Advantage 3.11, with an expected Go-Live timeframe of spring, 2020. Additional updates will be provided at www.wvoasis.gov. Thank you for your support during this upgrade.
